Aluminium Windows and Doors

Be Inspired...

Stratton Glass & Windows has been trading in Norfolk and Suffolk since 1979.

We have outlived more than four 10 year warranties.
During this time we have used various window and door constructions. This has given us the invaluable opportunity to wean out the weaker profiles that can be susceptible to repeated service calls.
We are incredibly proud of our aluminium range due to its durability, quality and style. We hope you like it too.

"We are delighted with our new conservatory... were honest - with no games." Mr & Mrs P - Yell.com

"Very well managed, and completed in a remarkably short space of time."
Lynn - Google.com

Over 40 Years Continual Trading!

CHOOSING YOUR HOME IMPROVEMENT COMPANY...

Stratton Glass & Windows are a safe and easy option to choose as your home improvement company. We only supply high quality windows and doors, for fair prices. We recommend visiting one of our two showrooms in Diss or Long Stratton to see the quality for yourself.
We have been trading locally since 1979, so you know your guarantee is safe in our hands.

Stratton Glass & Windows Ltd

Our Company Story So Far...

As a local, family run company since 1979, we have always followed the same formula: to only provide good quality products and service, for a fair price. We still follow this simple value today, and believe this foundation is why our customers keep choosing us to improve their homes.

Starting in Long Stratton in 1979, trading from a humble office space and a beat up old van, Nicholas Jones established Stratton Glass & Windows.

In 1990, we moved to our Long Stratton warehouse, where we still trade today.

In 2000, we sucessfully and proudly expanded to a small showroom on Victoria Road in Diss, Norfolk.

In 2005, we moved to our current, purpose-built showroom and warehouse facility on the popular trading estate Hopper Way in Diss, Norfolk. Providing a wide display of products for customers, this move proved itself quickly.

From our humble beginnings in 1979, thanks to our devoted local customers and dedicated and hard working team, we're still trading over **40 years later!**

In 2014, Nicholas Jones entrusted the company to his son, Harry Jones, who proudly runs the family company to this day.

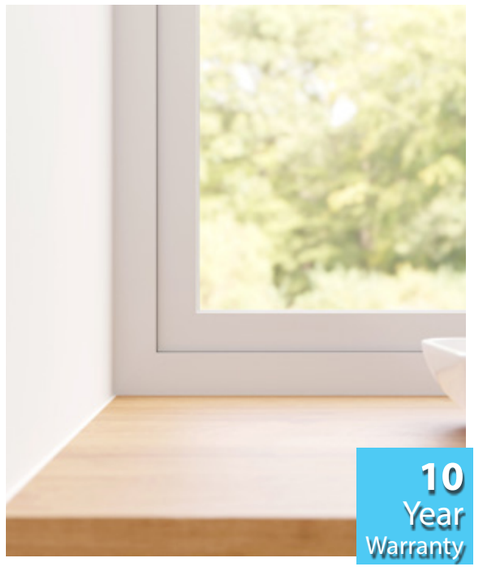

Visit our up to date Diss showroom to see our products and meet the team for yourself.

Style In Mind...

Choosing the right windows for your home is an important decision. Our SL aluminium incorporates many new innovative ideas, creating a warmer, slimmer and more secure window system.
In a choice of heritage and contemporary styles, and offering an extensive range of colours, our SL aluminium windows and doors system is designed for a more premium finish.

BUILDING REGULATION PART L COMPLIANT

In 2022, the goverment introduced new thermal insulation requirments for replacement and newbuild window and door installations – making some aluminium profiles redundant.

We are pleased to confirm the entire Stratton SL range is Part L compliant, achieving a WER A rating or 1.4 W/m^{2}K U-value when double glazed. Going further, some of the Stratton SL assemblies are capable of achieving a WER A+ rating, with a 1.0 W/m^{2}K U-value when triple glazed, which easily achieves compliance for newbuild homes.

PART L Compliant

Ultra Slim Frames

Our SL aluminium window and door frames are stronger compare to the uPVC equivilent and, therefore can be much slimmer. The SL classic fixed frame is just 35mm thick, making it alsmost 40% slimmer compared to the uPVC option.

Stratton Glass & Windows Ltd

Aluminium Windows

Experience the perfect blend of security and aesthetics with our uniquely crafted windows. Using a patented construction method, our windows feature a cutting-edge design that seamlessly combines **slim frames** with **unparalleled security**. Our commitment to aesthetics is evident in the sleek and slender frames, allowing an influx of natural light to flood into your home.

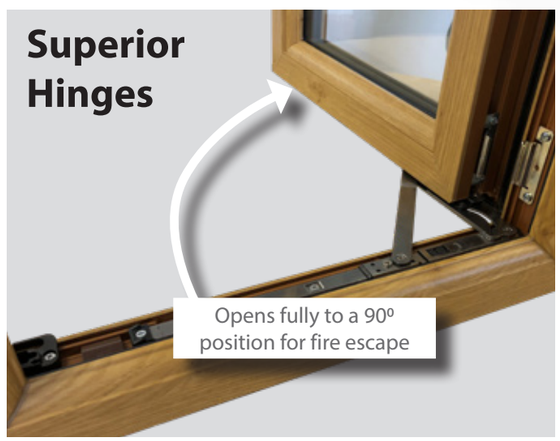

MADE IN BRITAIN

Local
Family Run Company

Double and Triple Glazing Options

Our aluminium windows are available in both 28mm double glazing and 36mm triple glazing options – choose triple glazing for optimal thermal insulation performance, with U-values as low as 1.0 W/m²K.

Bay and Bow Windows

Bay or bow windows are a great way to bring more light into your home. Choose from different styles and colours to get exactly what you need.

Fly Mullion Option

Known as a French casement or floating mullion window, this option enables the usually fixed vertical section of the frame, dividing two opening window sashes, to open – similar to a French door.

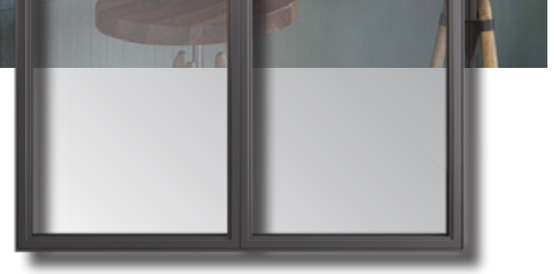

This design allows you to open the entire area, maximising airflow and providing an increased opening for emergency escape.

Internally Glazed System

Our SL aluminium window and door sashes come with standard internal glazing, meaning the glass is installed from the inside. This is safer for our installers but also provides **enhanced security** as it prevents potential intruders from removing the glass from the outside.

Window Frame Styles

The Stratton SL aluminium window comes in a choice of 2 finishes – either a heritage or contemporary finish to suit any home.

Note: frame thickness can vary depending on the application. This is determined and specified by our surveyor once ordered.

Contemporary Flush

Stepped Heritage

Seemless Design...

Unlike some profiles, our aluminium windows and doors are designed to seemlessly blend together, with matching flat or stepped finishes. Rest assured your home can have a consistent style and finish.

Aluminium Bifold and Hinged Doors

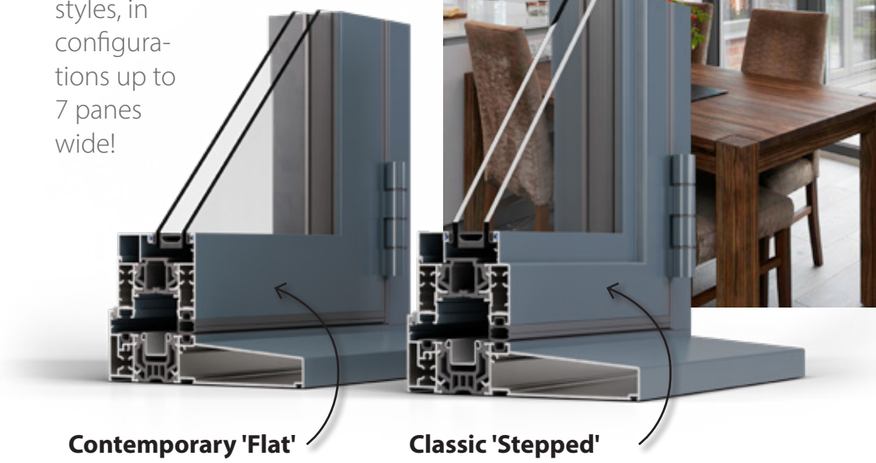

Our SL aluminium doors are available as single entrance doors, French doors and bi-fold doors. They enable you to open up and transform your home, providing that all important flexibility to enjoy your indoor and outdoor space as one. Combining the refined, slimline architectural look of aluminium and the latest thermal and security technology.

Stratton Glass & Windows Ltd

Choice of Two Styles

These slim, perfectly balanced bi-folds are available in stepped and contemporary 'flat-faced' styles, in configurations up to 7 panes wide!

Contemporary 'Flat' **Classic 'Stepped'**

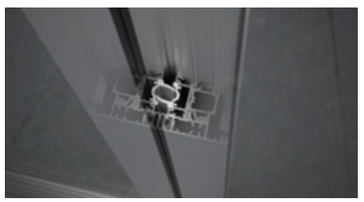

Double glazed 1.4 W/m²K U-value, triple glazed as low as 1.0 W/m²K.

Thermal transmittance, also known as a U-value (W/m²K), measures the rate of transfer of heat. The better insulated your bi-folding door is, the lower the U-value will be. Available with up to 44mm triple glazing for the ultimate thermal performance.

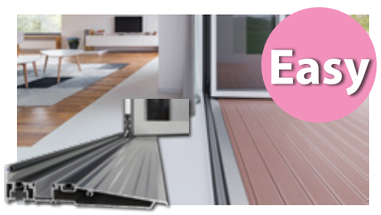

Slimline Design

Slim **138mm** frame sightlines between sashes and slim intermediate internal handles provide a sleek aesthetic.

Full length Interlocks

For extra peace of mind, our Prestige bi-folds use full length security interlocks on applicable door styles.

Low Level Thresholds

For an easy step, see our threshold options on page 29 and discuss with our surveyor upon ordering your doors.

Colour Range

Choosing the colour of your windows and doors is a big decision. That's why we think it's important to offer a wide range of colours and finishes to suit your personality and property. Whether you want to replace like-for-like, complement your brickwork or render, or make a bold statement, we can meet your needs.

Note: Some colours offer a RAL colour match code (shown with 4 digits on the colour).

Some colours are specially made, so have longer lead times on manufacture. Please speak to us about current availability.

Colours shown are for illustrative purposes - print can distort the true colour. Please ask us to see a swatch for an accurate colour.

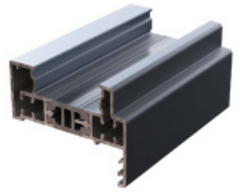

Bespoke Colours

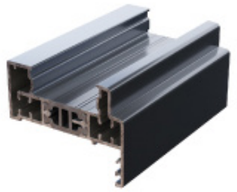

Alongside our stock classic, premium and anodised colour ranges, we've also seen growing demand for bespoke colours. So whether you want to match your kitchen cabinets or brickwork, we can provide **any RAL colour**. Alongside this, we can also offer dual colour to provide a different colour outside to inside.

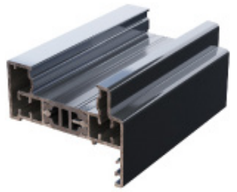

Finish Options

When ordering bespoke colours, we can provide any RAL colour in a variety of finish options, including matt, satin or gloss.

Matt Finish

Satin Finish

Gloss Finish

In addition, we can also offer fine texture and special finish options on request, which are often popular on architect-lead design projects. Contact us for more information.

Heritage Design

Completing our ultra slim aluminium range is the new Classic Heritage Door, featuring a period inspired lockbox design – you can also include a heritage handle to match.

New

Classic Slimline Doors

The Classic Slimline Door is designed to match our Classic aluminium window range.

For period renovations, the Classic Slimline Door can also be used to create authentic looking traditional or classically inspired doors. Available as both french and single doors, the Classic Slimline has specifically designed Georgian-styled bars for a distinctive period aesthetic. These can also create a more modern contemporary look, producing the right style for every home.

Decorative Glazing Options

Add character to your frames using leaded or Georgian bar layouts, including grids, diamonds or single horizontal/vertical bars. Alternatively, we offer internal blinds that are in between the glass to prevent damage. Choose from manual blinds or fully electric blinds for a real wow-factor!

Internal Georgian Bar

Internal bars in between the glass are a less costly way to achieve the bar effect, with the added benefit of easy cleaning.

Mounted Astrical Bar

Mounted bars are attached to the glass along with an internal spacer in between the glass to provide an authentic appearance.

Leaded Window

Using adhesive lead, we can create traditional patterns including diamond and square leads.

Internal Blinds

Internal Venetian blinds can be fitted in between the double glazed unit, preventing damage and the need for cleaning.

Stratton Glass & Windows Ltd

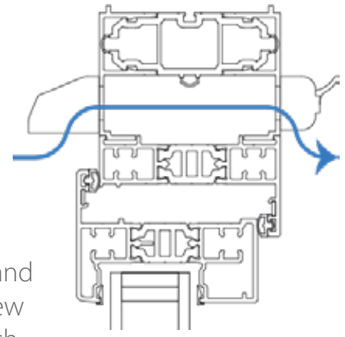

We understand deciding on which window or door to choose can be a daunting task! With this in mind, we have a table that includes some key comparative information to help ease your decision. If you are still stuck, we're just a phone call away.

Trickle Ventilation

Since 2022, part F of building regulations have made trickle ventilation compusory for the majority of window installations.

Trickle ventilators have never been a popular feature, due to their unsightly appearance.

With this in mind and considering the new requirements which mean the majority of our customers now need ventilators, we have introduced an overhead ventilation system.

Tilt & Turn Option

The Tilt & Turn window opens inward, pivoting from the bottom or the side – making them ideal for cleaning from inside. The Tilt & Turn window offers a greater scope for larger opening lights compared to traditional casement windows, so they are perfect as a fire escape or simply to let in more fresh air, and the larger panes of glass help its thermal performance too.

Sliding Patio Doors

Our aluminium sliding doors maximise light with large glass areas, with the option of slim meeting stiles and concealed outerframes to provide unobstructed views when closed.

Sliding Patio

Blending the advantages of a spacious picture window that floods internal spaces with light and an effortless opening mechanism, Visoglide Plus stands out as a first class, versatile system suitable for large projects. It excels in thermal efficiency, presenting modern aesthetics and durable performance. Choose between slide or lift-and-slide operations on double or triple tracks for added flexibility.

Slim Interlock Option

Choose the 35mm interlock for enhanced architectural elegance. Minimising sightlines, it ensures unobstructed views, seamlessly combining functionality with design excellence. This choice reflects meticulous attention to detail, creating a visually striking environment.

Maximise Glass Size

Achieve expansive sightlines with our doors, customisable up to **2500mm in height**. Designed for large glass areas, they boast a sliding weight capacity of up to 250kg, ensuring both functionality and a seamless indoor-outdoor connection.

Maximise Space

Additionally, sliding doors maximise floor space utilisation, as they do not swing open like traditional doors, allowing you to place items next to the doors. This feature is particularly advantageous for smaller rooms or areas with limited space, or when bridging between rooms and a conservatory.

Double or Triple Glazed

Elevate your space with the assurance of enhanced insulation and energy efficiency. Our sliding door systems offer a choice between double glazing and the superior triple glazing. Opting for triple glazing ensures an even higher level of thermal performance, surpassing the benefits of double glazing. Experience a seamlessly efficient solution that not only adds style to your surroundings but also prioritises sustainability, making every slide a step towards optimum thermal comfort.

Up to Triple Track

Our sliding patio door systems can be provided as dual track, or to provide a wider, more impressive opening, choose the triple track option.

Choose standard inline tracks for reliable cost-effective functionality or opt for our lift and slide option for a smoother glide and added sophistication.

Aluminium Casement Window Furniture

At Stratton, we only provide the best quality windows and doors, which is why we choose to use the robust yet stylish ERA Everywhere furniture. The lockable crank handle has been tested through 50,000 cycles and meets PAS24:2012 requirements to keep your home secure.
