Conservatories and Glazed Extensions

Stratton Glass & Windows Ltd

Your Local Home Improvement Company Since 1979

Be Inspired...

Stratton Glass & Windows has been trading in Norfolk and Suffolk since 1979.

Over this time, conservatories have developed significantly. With solar control glazing, contemporary features and solid tiled options, our range of conservatories and sun-rooms help increase your living space whilst adding value to your home.

You can rest assured that our skilled and enthusiastic team will design and install your dream conservatory or orangery to the highest standard.

At Stratton Glass & Windows Ltd, we are with you every step of the way: from planning and design all the way through to installation and sign off. Our experienced team will manage your installation with great care and attention to detail.

We are incredibly proud of our conservatory and orangery collection due to its vast versatility, durability, quality and style. We hope you like it too.

Over 40 Years Continual Trading!

CHOOSING YOUR HOME IMPROVEMENT COMPANY...

Stratton Glass & Windows are a safe and easy option to choose as your home improvement company. We only supply high quality windows and doors, for fair prices. We recommend visiting one of our two showrooms in Diss or Long Stratton to see the quality for yourself.
We have been trading locally since 1979, so you know your guarantee is safe in our hands.

Stratton Glass & Windows Ltd

Our Company Story So Far...

As a local, family run company since 1979, we have always followed the same formula: to only provide good quality products and service, for a fair price. We still follow this simple value today, and believe this foundation is why our customers keep choosing us to improve their homes.

Starting in Long Stratton in 1979, trading from a humble office space and a beat up old van, Nicholas Jones established Stratton Glass and Windows.

1979

In 1990, we moved to our Long Stratton warehouse, where we still trade today.

1990

In 2000, we sucessfully and proudly expanded to a small showroom on Victoria Road in Diss, Norfolk.

2000

In 2005, we moved to our current, purpose-built showroom and warehouse facility on the popular trading estate Hopper Way in Diss, Norfolk. Providing a wide display of products for customers, this move proved itself quickly.

2005

From our humble beginnings in 1979, thanks to our devoted local customers and dedicated and hard working team, we're still trading over **40 years later!**

In 2014, Nicholas Jones entrusted the company to his son, Harry Jones, who proudly runs the family company to this day.

Visit our up to date Diss showroom to see our products and meet the team for yourself.

GET THE LOOK

A wide range of high-performance conservatories, perfectly tailored to you. Warm, elegant and bright, every conservatory style features high performance glass and endless conservatory design options. This guide is here to help you choose the most appropriate addition to your home.

CLASSIC

Add a different type of living space to your home, using a combination of glazing and small walls. The classic conservatory incorporates the latest technologies in glass/poly roof and glazing design, and can be complemented with a range of optional extras.

CONTEMPORARY

Adding a host of features to the classic roof, including the latest super insulated column technology, and decorative cornices, gives a sense of grandeur to the conservatory. Internally, the plastered columns and insulated pelmet gives a cosy feel.

GLAZED EXTENSION

A true, all year round, prefabricated extension/sun room. Blend the benefits of solid roofs and glass conservatory roofs. With vaulted ceilings, this is an outstanding design that is not only thermally efficient, but maintains light and creates an architecturally stunning living space.

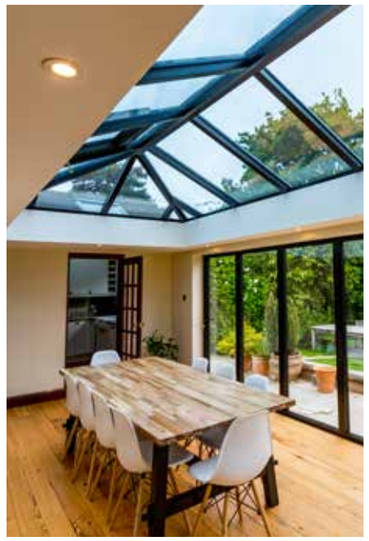

Stratton Glass & Windows Ltd Est. 1979
www.strattonglasswindows.co.uk

Glazed Extension Roof Styles

Gable Front

The front panel of the roof remains upright for impressive high ceilings. Its square design provides optimal floor space.

Edwardian

This hipped roof design is a flat-fronted style that provides excellent floor space due its a square or rectangular shape.

Victorian

This provides a distinguishing architectural feature, with either an angled 3 bay or 5 bay front.

Lean-To

Provides a simplistic design whilst achieving optimal space. The lean-to design is one of the most widely used roofs.

Hybrid Orangery

Contemporary design on a classic orangery. Using modern design, you can own an orangery for conservatory prices.

Loggia

This design can host most roof styles. It comprises of modern aluminium columns and cornice to hide the plastic gutters.

Orangery

A premium extension built with brick walls and an optional plinth. This classic atrium design includes internal pelmets as standard.

P-Shape

Ideal for larger properties, a P-shape combines two conservatories into one – for example a lean-to and a Victorian.

T-Shape

This grand design combines a lean-to style with either Edwardian or gable features that are also better suited to larger properties.

Conservatories

“We are delighted with our new conservatory”...
“were honest - with no games” Mr & Mrs P - Yell.com

“Very well managed, and completed in a remarkably short space of time.”
Lynn - Google.com

www.strattonglasswindows.co.uk

Classic Conservatory Advantages

At Stratton Glass and Windows we have been installing conservatories for almost 5 decades! This has helped us become a leading conservatory installer in East Anglia.
One of the main factors of our success is the classic roof system that we use. It is safe, secure, thermally efficient and looks great.

Super Strong, Multi Chambered Rafters

Every Stratton Glass and Windows conservatory roof uses a **heavy duty glazing bar** system.
Our glazing bars are topped off with our **multi chambered** uPVC capping to enhance the roof's thermal efficiency.

Ventilated Ridge

Ventilation of your new living space is vital to maintain a comfortable environment.

Our **super strong,** classic conservatory ridge comes with a **built-in ventilation system.** As warm air rises, this built-in system allows moisture to escape, minimising the potential of condensation and damp.

BBA Approved

All of our roofs are structurally checked on our bespoke software before manufacture.
In fact, the conservatory roof system we use was given a life expectancy of at least 25 years by the BBA (British Board of Agrément) and was the first in the industry to acquire this accreditation.

Safest Roof

Our conservatory roof is **the only roof system engineered to postcode.**
NASA satellite data is used to calculate the maximum wind and snow loadings.
Each and every day our Classic conservatory roofs are performing in the most extreme conditions... this is the ultimate peace of mind.
Tried. Tested. Trusted.

Style In Mind

Our versatile classic roof and specialist design software allows us to create your dream glazed space.

Stratton Glass & Windows Ltd

Internal Conservatory Options

A conservatory isn't just a white box anymore. We offer internal pelmets and plastered columns for an orangery effect, solid roofs with glazing panels, coloured frames and specialist lighting and heating, all of which make the space warm and cosy in the winter whilst maintaining the light and spacious feel of a glazed sunroom.

Internal Pelmet

Adding the optional internal pelmet to your conservatory adds warmth and style. The finished article achieves the **appearance of an orangery** from the inside without the added cost of multiple trades and engineering calculations normally associated with traditional orangeries. This modern design is created by adding framework internally that is packed with insulation and then plastered to create an impressive angular finish. The pelmet is ideal for hosting contemporary **LED downlighters** and even speakers.

Lighting

Choose from wall lights, hanging ridge lights, lamps or for a modern twist, upgrade to a pelmet to allow for LED downlights. We also offer a plastered ridge to add to the warmth of the room, perfect for hanging lights or LEDs.

Solid Roofs

Our **ALL NEW solid roofs** offer a contemporary twist on the conventional conservatory. Not a conservatory or extension, but a sunroom! Thanks to modern insulation, they come with vaulted ceilings. Unlike the conventional conservatory, these truly are **all year round rooms**.

We recommend adding **glazed roof lights** to flood the room and host room with natural light.

Heating

Whilst your conservatory will be thermally efficient, it will need heating.

Choose from electric panel heating, designer electric corner heaters, underfloor heating or traditional plumbed in radiators.

Flooring

We can leave the concrete as left by the builder to allow you to source your own flooring.

Alternatively, we have a variety of floor choices for you to choose from including tiles, laminates, vinyl, timber and carpets. We can lay skirtings too.

Optional Slim Ridge

Introducing the **ALL NEW**, innovative **slim ridge**. Say goodbye to the bulky ridge ends traditionally assocated with classic conservatories. Available on all Edwardian roofs with a 25° pitch, this option allows more light into the room and maximises your views of the sky!

New

Corner Columns

As shown below, you can choose from brick, render or super insulated aluminium columns. The super insulated, aluminium columns are **five times more thermally efficient** than a similar sized brick column. Choose from a **smooth** or **fluted** aluminium finish, to complement or as a contrast to your property.

Super Insulated
(Fluted or Smooth Aluminium)

Brick

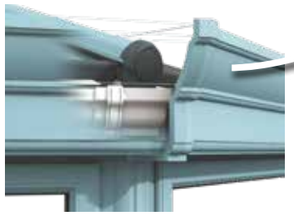

Render

Gutter Or Cornice

For a smooth and stylish finish, hide the uPVC gutters with our unique **aluminium cornice.**

Classic Cornice

1 High Cornice

2 High Cornice

3 High Cornice

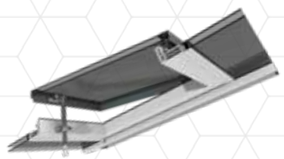

Colours

Choose from 35 foiled finishes in both smooth and grained effect, including wood grain and stylish greys.

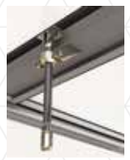

Specific colour in mind? We can also professionally spray your frames to **ANY COLOUR!**

Roof Vents

Available as manual or electric.
Our electric vents include thermostats and rain sensors for automatic open and close action.

Optional Ultrasky

Choose the Ultrasky roof if you want an even more contemporary design. Combining modern styling with natural light to create a beautiful, warm and glazed extension. A stronger, thermally efficient ridge means fewer bars are needed, drawing more light into the room. The Ultrasky roof creates a hybrid orangery as standard with the internal pelmet and external cornice to create a beautiful orangery roof style.

Less Frame, More Glass

Upgrade to slimmer, yet stronger rafters and ridge, allow glass up to **1.5m wide!** Meaning less frame and more glass.

Up To 6.5m Spans

Using the Ultraspan beam we can achieve **spans up to 6.5m** – perfect for bifold and large sliding patio doors!

Internal Pelmet

The Ultrasky roof includes our internal pelmet as standard. Ideal for hosting downlights.

Solid Roof - Sunrooms

10 Year Warranty

★★★★★

"Many thanks and would certainly recommend such a professional service."
Mrs Sutton - Reviewcentre.com

★★★★★

"Workmanship can not be faulted...Nothing was too much trouble and I would recommend this company." Mrs Anderton - Google.com

All Year Use in ALL seasons

Rest Assured!

Our tiled roof system provides strength and durability, but most importantly looks great!
Each and every lightweight tiled sunroom roof will be structurally tested against your postcode at design stage, and will NEVER NEED AN UNSIGHTLY TIEBAR – for a clean, simple, yet sylish design.

Stratton Glass & Windows Ltd

Lightweight Tiled Sunroom Options and Features.

The Stratton ***Ultraroof*** offers magnificent vaulted plastered ceilings, to enhance the feeling of space within the room. With thermally efficient U-values as low as 0.13, authentic looking tiles, and optional glazed panels, the Ultraroof provides a warm, bright space.

Local
Family Run Company

MADE IN BRITAIN

No Tie Bars Ever

Most competing roofs require unsightly tie bars to keep the roof structure sound. However, our 380mm ***Ultraroof*** beam **NEVER requires a tie bar.**

Long Lasting

The Ultraroof is pre-fabricated and structurally approved. The roof is also topped with low maintenance, UV resistant tiles as standard.

Optional Full Length Glass

For a truly bespoke design, the Ultraroof offers full length glazed panels to flood your home with natural light.

Optional Velux Rooflights

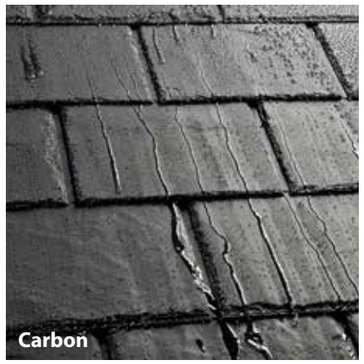

If you prefer, we can install opening Velux roof-lights into the Ultraroof – from 698mm high all the way up to 1178mm high.

www.strattonglasswindows.co.uk

Ultraroof Colours

We offer a variety of colours to suit your home. The uPVC fascia comes in a choice of **Standard White, Rosewood, Irish Oak, Gale Grey, Black** or **Golden Oak**. The tiles (shown below) are offered in a choice of **Carbon Grey, Terracotta** and **Harvest Brown.**

Gable Overhang

On gables we offer a standard 40mm overhang or a 470mm extended option.

Tudor Soffit Overhang

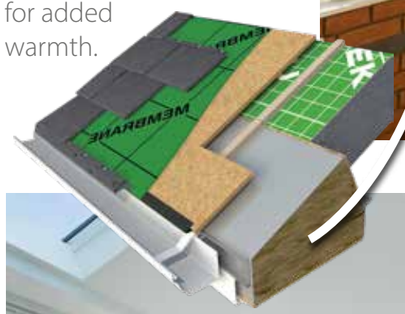

The Tudor design for the Ultraroof tiled roof offers an attractive and innovative option for 3 bay Victorian bases with wide fronts or unqual angles.
This cantilever overhang can extend up to 1200mm from the corners.
Downlights can be installed to add to this impressive and unique finish.

Highly Insulated Box Beam

Most solid roof systems have a hollow aluminium beam that sits on top of the window frames. Aluminium is cold so can attract condensation causing damp spots.
To prevent this our roof comes with engineered timber beam that is **packed full of insulation** for added warmth.

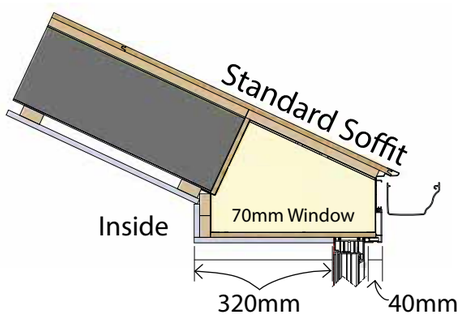

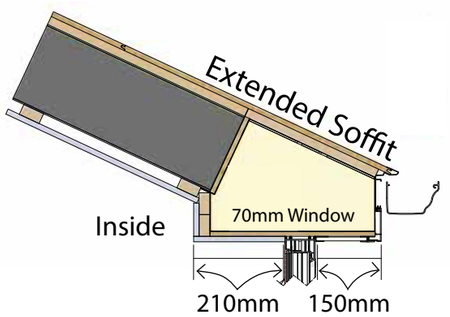

Internal Pelmet

Rather than the frames meeting the vaulted ceiling at 45º, which can be awkward and leaves a sloppy plaster finish up to the frames, our insulated box beam forms a stunning, **90º angular pelmet** internally. The internal pelmet is perfect for hosting **wireless speakers** and/or **LED downlights**.

Soffit Choices

The Stratton ***Ultraroof*** comes with 2 soffit depth choices. The insulated beam is always the same size but we can position the windows and doors depending on your choice, a shown below.

Note: sizes above are a guide – soffit sizes and internal pelmet can vary depending on various factors.

Livinroof Solid Roof

Livinroof substantially overcomes the twin issues of your conservatory being too hot in summer and too cold in winter. Moreover, it creates a beautiful vaulted ceiling with a stepped detail using the insulated internal pelmet – also perfect for downlights.

Lowest Pitch

No other solid roof on the market is as flexible. Depending on your design requirements, its pitch can be adapted from 5° all the way up to 40.9°.

Long Lasting

Based on the 25 year life expectancy, BBA approved classic roof, the *Livinroof,* is also pre-fabricated and structurally approved.

Fire Tested

The components in the ***Livinroof*** have been tested as part of a fully assembled roof – not just in isolation. This ensure the entire roof is tested for peace of mind.

Specify Shape and Position of Glass

Unlike some roofs, the Livinroof is incredibly versatile. Choose to have as much or as little glass as you wish – best of all, glass can be on angles!

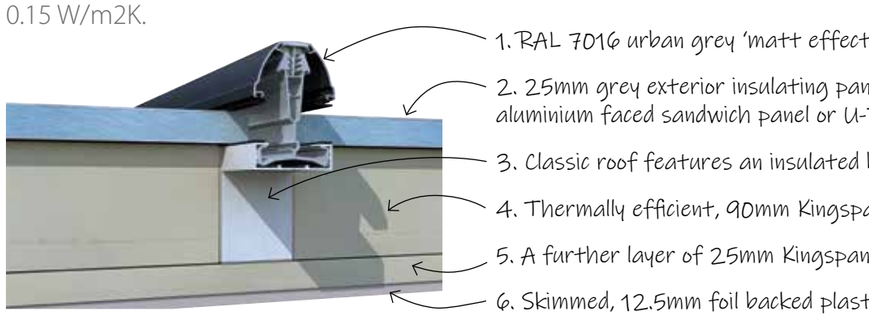

Internal Pelmet

Unlike other lightweight roof systems – rather than the side glazing awkwardly meeting the vaulted ceiling at 45⁰ – leaving a sloppy plaster finish – our roof has a concealed **insulated** caging (shown adjacent) that optimises thermal efficiency and forms a stunning **90⁰ angular pelmet** internally – perfect for hosting **speakers** and/or **LED downlights**.

Roof Construction

The Stratton ***Livinroof*** is finished externally with grey uTech (polycarnonate) or aluminium panels for both a contemporary aluminium or traditional leaded roof look. The roof achieves U-values of 0.15 W/m2K.

Stratton Glass & Windows Ltd

Replacement Conservatory Roofs

Transform your conservatory into an extension. Either just replace the roof, replace the roof and side frames, or rebuild the base and brick walls to host the new design. Our roofs are lightweight and designed to fit seamlessly to your home.

Premium Flat Roof Orangery

An orangery is essentially a flat roof extension with glazing in the roof, and lots of glazing to the side elevations, combined with brick piers. Utilising either our classic roof system or Ultrasky systems, this design allows light in but is a true all year round insulated structure.

Local
Family Run Company

MADE IN BRITAIN

All Year
Use in ALL seasons

Parapet Wall Orangery

These timeless traditional extensions are best suited to larger properties. Topped with a glazed roof lantern that allows light to flood in during the day and allows you to gaze at the stars at night. This method involves constructing brickwork above the height of the lowest point of the roof to conceal the flat roof and guttering, achieving the impressive **traditional orangery**.

Roofline Orangery

This system involves us constructing an insulated flat roof that sits on top of the brickwork. We then install the desired quantity of glazed rooflights. Our glazed lantern roofs are constructed with slim bars to increase sight lines – meaning more glass and less frame!

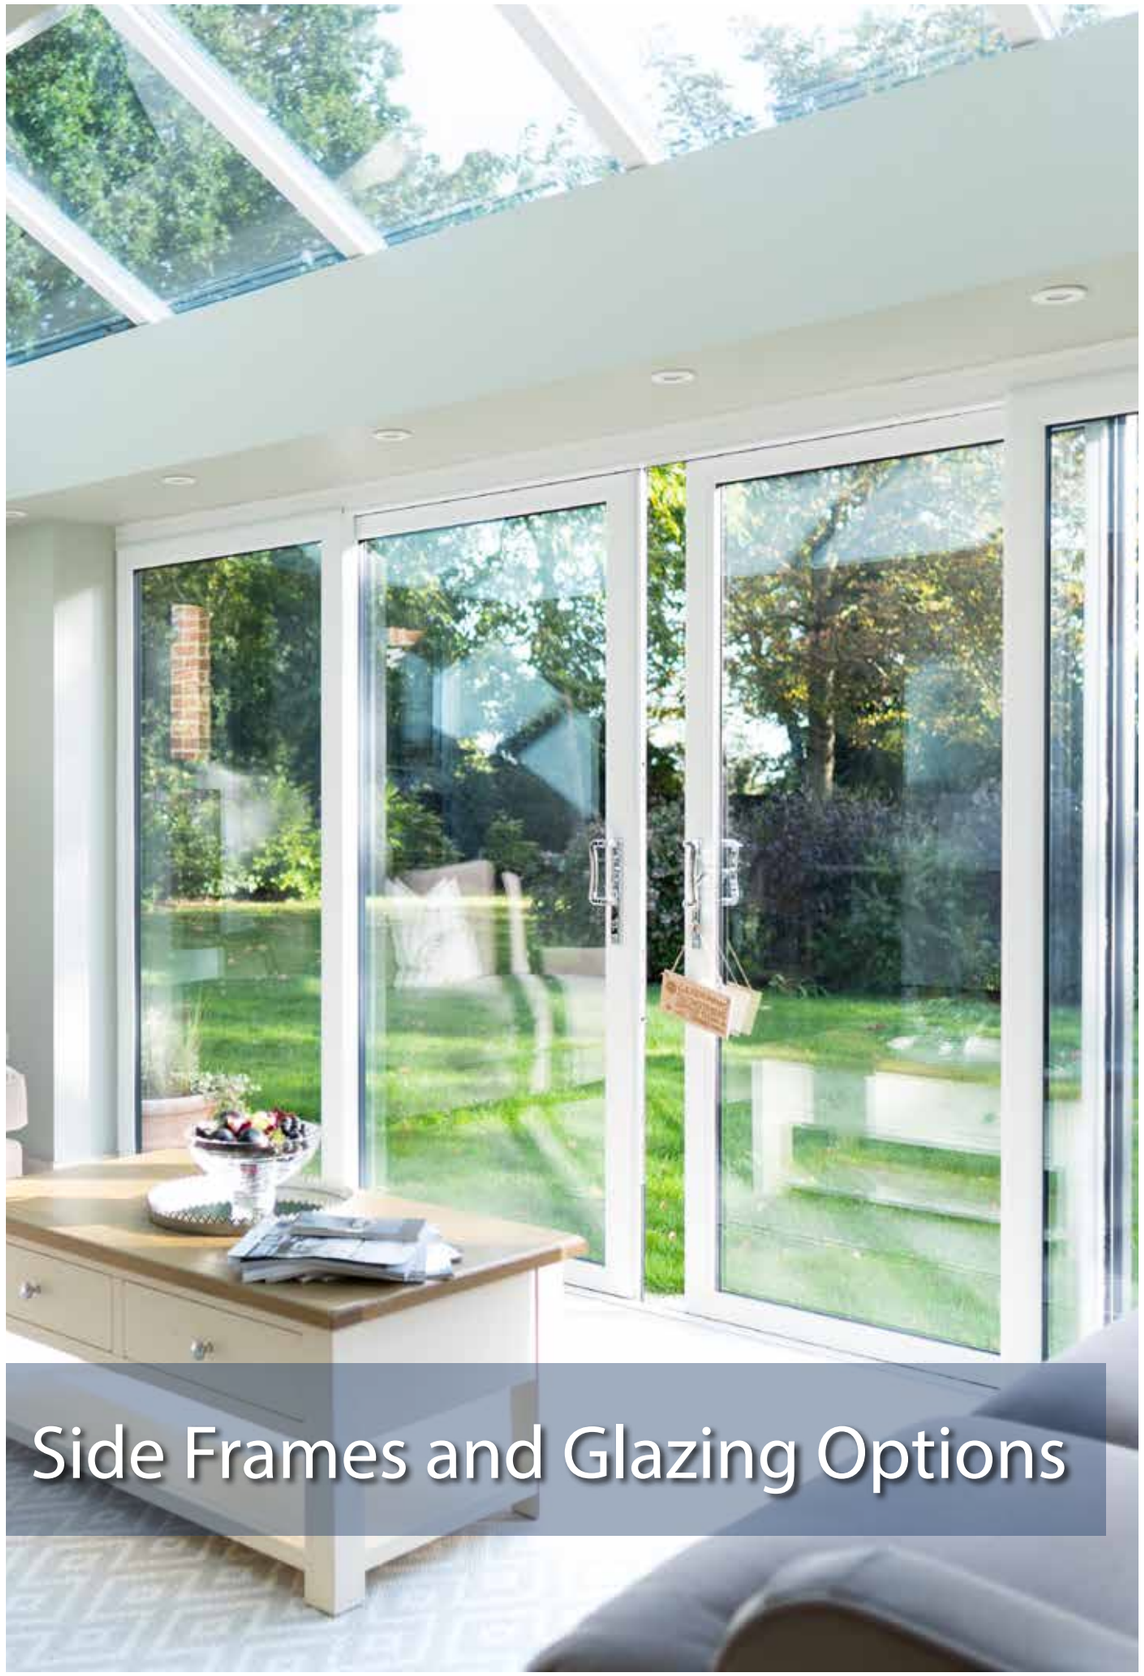

The timber roof is made watertight with a choice of finishes. We offer traditional asphalt flat roof, an EPDM rubber roof, or a fibreglass roof.

To add further character, we can finish the sides of the timber roof with decorative fascia and gutters – in a choice of uPVC or galvanised metal.

As with the plinth system, our fascia system has an internal pelmet that is ideal for hosting LED downlights and/or wireless speakers.

* Orangery assembly drawings above are for illustrative purposes only. Every structure varies depending on the construction.

Side Frames and Glazing Options

"Will be using them again and I would recommend to friends and family."
Roxifarrell - Reviewcentre.com

"knowledgable and polite...The disruption and noise were kept to a minimum."
Thehappy2attas - reviewcentre.com

Conservatory Door Options

The entrance and exit to your conservatory is an important decision. All of our doors are A rated as standard with the option to upgrade to A+. Our French door range can achieve up to an A++ rating with triple glazing.

French Doors

Available in both 'open in' and 'open out' styles, the hinged French door is an attractive option for conservatories. It allows you to open the entire aperture whilst having a practical traffic door. This option is best used with no obstructions, such as furniture or plant pots.

Sliding Patio Doors

Our patio door has slim sight-lines and allows vast expanses of glass to ensure you enjoy the maximum amount of natural light in your conservatory. The effortless opening mechanism and smooth motion provide a satisfyingly noiseless glide. For more details, see our doors brochure.

Bi-fold Doors

Bi-folding doors provide floor to ceiling glazing, creating a stunning entrance to your new glazed extension. On a lovely sunny day they give you the option to open up the entire aperture but also offer an optional traffic door for practical use in the colder months.

Conservatory Window Options

Windows provide ventilation but also significantly contribute toward the aesthetics of the build. Choose from fixed, tilt and turn, sliding sash, side/top hung casements or fanlight windows. Our design team can help visualise this for you with our specialist CAD software.

Casement Windows

Casement windows are the most common choice; they come in 3 finishes, including sculptured, chamfered and flush. They can be side hung, top hung, and have an option to be made with a fly mullion – so they open like French doors. For more details on the range, please see our casement windows brochure online.

Side Hung &/or Top Hung Option

Fly Mullion Window Option

Sculptured

Chamfered

New

Flush

Tilt and Turn Windows

Tilt and turn windows are fantastic for conservatories as they allow impressively large openings, meaning you can have full height openers from the brickwork all the way up to the eaves for more glass and less frame. They "tilt" inwards for ventilation or with a further twist of the handle the window opens all the way on side hinges.

Decorative Glazing

Add character to your frames with leaded or Georgian bar layouts, including grids, diamonds, single horizontal/vertical bars. Alternatively, we offer internal blinds that are in between the glass to prevent damage. Choose from manual blinds or fully electric blinds for a real wow-factor!

Local Family Run Company

Internal Georgian Bar

Internal bars in between the glass are a less costly way to achieve the bar effect, with the added benefit of easy cleaning.

Mounted Astrical Bar

Mounted bars are attached to the glass along with an internal spacer in between the glass to provide an authentic appearance.

Leaded Window

Using self-adhesive lead, we can create traditional patterns including diamond and square leads.

Internal Blinds

Internal Venetian blinds can be fitted in between the double glazed unit, preventing damage and the need for cleaning.

Stratton Glass & Windows Ltd

Conservatory Colours

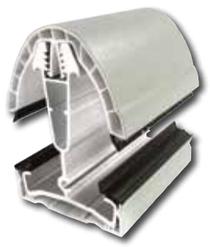

You are already on the way to making a life-changing decision by choosing a conservatory. Do you choose conventional conservatory colours/finishes, or do you opt for something different? The classic glass roof comes in a choice of 9 standard colours (including white) and can also be **specially sprayed to any RAL or BS colour**.
Our side frames have a vast choice of colours. See our specific windows brochures online for more details.

Classic Roof Stock Options

Sage Green
(grained)

Cream

Stratton Glass & Windows Ltd Est. 1979
www.strattonglasswindows.co.uk

Roof Glazing Options

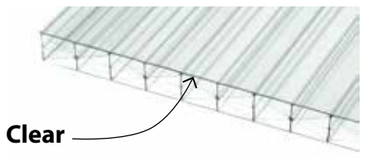

Conservatory roofs are glazed with polycarbonate sheets or double glazed units (glass). Polycarbonate is the cheaper option but generally isn't as efficient. Glass is the ideal glazing option to any conservatory or orangery to maximise light, whilst achieving high thermal performance. **It is important to note that south facing conservatories receive the most solar heat gain, while north facing ones gain the least.**

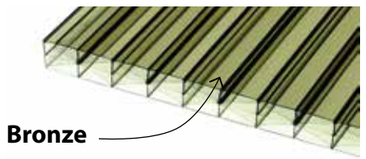

Polycarbonate Roofs

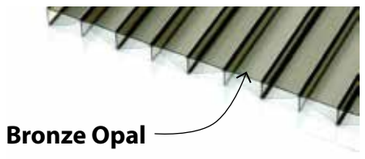

Polycarbonate is a very popular glazing material due to its unique lightweight, durable and unparalleled strength – up to **200 times stronger than glass** and virtually shatter-proof. With a colour choice of Clear, Bronze, Opal, Bronze Opal and Heat-guard, all are designed to reduce glare and minimise solar heat gain. Bronze/Opal gives a bright internal appearance even on a dull day, reduces solar heat gain and provides privacy. Heat-guard limits the potential for heat build-up within the conservatory, whilst allowing light to enter the roof, deflecting solar radiation and reducing solar heat gain.

Clear

Bronze

Opal

Bronze Opal

Heat-guard

	Light Transmission		Solar Transmission		U Value W/m2K		Shading efficiency	
Polycarbonate Sheet	25mm	35mm	25mm	35mm	25mm	35mm	25mm	35mm
Clear	65%	51%	63%	55%	1.7	1.3	73%	72%
Opal	31%	29%	37%	35%	1.7	1.3	42%	41%
Bronze	24%	11%	26%	14%	1.7	1.3	30%	27%
Bronze/Opal	11%	18%	16%	22%	1.7	1.3	18%	17%
Heat-guard	5%	8%	8%	8%	1.7	1.3	9%	9%

* Figures stated above & adjacent are guides as to the performance of the related product colour and can vary marginally.

Glass Roof Options

We offer a range of high performance Insulated Glass Units that are specifically designed for conservatory roofs – all provide high levels of insulation. Optional features include true self-cleaning glass and solar-control. Each of these product combinations provide enhanced performance, comfort and value.

Self Cleaning

Using sunlight and rain, this glass keeps itself clean all year round.

Heat Reflecting

Helps keep your environment cool when it's warm outside during the summer months.

UV Blocking

Blocks UV from the sun, helping to protect your furniture from fading.

Light Transmittance

Optimal light transmittance allows as much light in as possible and lets you see the sky.

Quiet

Unlike polycarbonate, glass doesn't sound like a snare drum when it is raining.

Highly Insulated

Insulation is measured in W/m^{2}K, this is known as the U Value. The lower the U value, the less heat escapes through your roof and therefore reduces your heating costs.

Roof Glass Options	Heat Reflection	Light Transmission	Colour	U-Value (W/m2K)	Self-cleaning Properties
Stratton Ambi Sunshade Plus - ULTRA	91%	8%	Dark Grey/Black	1.0	No
Stratton Ambi Sunshade Plus - Green	82%	30%	Green	1.0	Yes
Stratton Ambi Sunshade Plus - Blue	82%	25%	Dark Blue	1.0	Yes

Stratton Glass & Windows Ltd Est. 1979

www.strattonglasswindows.co.uk

Our Step-By-Step Guide

1.

Design

Our staff can help you through this process. Our software checks the structural integrity of the build but also generates a 3D drawing to help you visualise the end-product.

2.

Quote and Order

Once you have chosen your design, our team can generate a competitive price. For clarity and your peace of mind we provide a breakdown listing exactly what is included.

3.

Planning

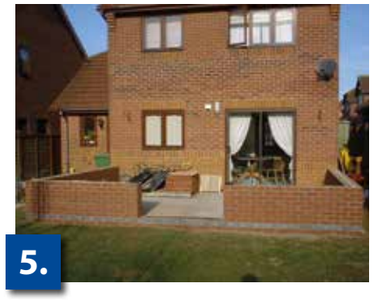

The majority of conservatories don't require planning due to the relaxed permitted developments. However, if required we can arrange for planning to be carried out on your behalf.

4.

Technical Survey

A technical survey is carried out by one of our professional surveyors to assess the site and take accurate measurements.

5.

Building Work

We will lay the foundations and brickwork for your new conservatory, creating a solid structure ready for the framework.

6.

Install Side Frames

Once the building work is complete, our trained conservatory installers will install your new side frames.

7.

Roof Structure

Once the side frames are in place, we will install your chosen roof and glaze the structure to make it watertight.

8.

Finishing Touches

We offer all the trades to complete your conservatory from start to finish, including electrics, flooring and plastering.

9.

We Move Out, You Move In

Once all of our trades are complete, we will clean down your new conservatory ready for you to enjoy for years to come.

Stratton Glass & Windows Ltd Est. 1979
